PROJECT

Business-IMS - *inventory management system*

025 Dec 2024 - 20 Mar 2025

- Restrict access and permissions based on user roles (Superadmin, Store Admin, Manager, Staff, etc.).
- Superadmin can create, update, and delete multiple stores. Manage multiple stores from a centralized panel.
- Store Admin can manage their stock, purchases, sales, return sales, suppliers, customers, and employees.
- Record sales transactions and generate invoices. Manage return processes efficiently with refund tracking.

Daily Blogs - *Blog for daily life.*

06 May 2024 - 08 Sep 2024

- Users can create an account with full role-based authentication to interact with the platform. Uses SMTP services to verify email addresses during account creation.
- Allows users to recover their passwords if they forget them. Utilizes next-auth version 4.24.5 for authentication.
- Next.js 14: A React framework for building server-rendered or statically-exported React applications.
- Tailwind CSS: A utility-first CSS framework for styling the user interface.
